

# 911eye: enabling the public to stream directly to Communications Centers

INSIGHT

RESPONSE

SAFETY

## Situational awareness for Dispatchers

Dispatchers are under time pressure to question 911 callers to ascertain what is wrong, where they are, who they are and who is in danger in order to dispatch the right resources.

911eye live footage offers instant 'on scene eyes' to the dispatchers; providing immediate INSIGHT which helps them to assess the scenario and, with caller's location visible, to better select the appropriate RESPONSE to the incident – either as a 'real-time', immediate response or for a 'slow-time', non-emergency follow up – while at all times considering the SAFETY of responders and the public.

## Incident information for Responders

911eye live footage can also provide invaluable additional information to responders who have been mobilized to the incident.

The information provided, supplementing that which was initially taken from the 911 voice call, can provide further INSIGHT to the responders helping them to deliver the appropriate RESPONSE while ensuring the SAFETY of both themselves and the public. All the media is recorded securely as potential evidence for further investigation. The service is securely hosted and scalable for use in any organization.

## How it Works

911eye does not require anyone to download and install an app. Instead it works via SMS text message or email. The dispatcher simply sends a text or an email to the smartphone of the caller. By clicking on the URL link contained within the text message or email, a secure 'one-time-use' live video stream is enabled\*. The stream allows the 911 dispatcher to see the incident, assess how serious it is and decide what and how many resources to deploy. Additionally the caller's location, via GPS coordinates, are provided to the dispatcher.

Importantly, no footage is stored on the user's device. And if the caller has poor signal, or the device doesn't support video, they can opt to send still photo images instead.

When integrated into an agency's Communications Center, the video captured by 911eye can be downloaded and stored in order to secure crucial evidence as an incident unfolds.

Although, public safety is of paramount importance and 911eye should be used at the discretion of the dispatcher based upon authorized operating procedures to ensure that members of the public are not placed at any risk when using the service.

*\* subject to handset compatibility*

## System Features

- ⚙️ No app required - works on any smart device and operating system
- ⚙️ Confirms caller location via GPS coordinates, to speed response
- ⚙️ Secure, one-time-use link sent by SMS or email
- ⚙️ Real-time live video stream viewable by dispatch personnel or supervisors
- ⚙️ Maintains voice contact with caller while images are transmitted
- ⚙️ Still images available in lower signal coverage
- ⚙️ Secure cloud-hosted service and CJIS compliant
- ⚙️ Can reduce hoax call mobilizations

## Operational Benefits

- ✔️ Knowing what is going on in real time at an incident location is critical - **Protecting lives can be made much easier**
- ✔️ Arriving uninformed is risky and can impact decision making - **Accurate information can be supplied to responding units which can saves lives**
- ✔️ Capturing video communications as incidents unfold is a reality of the mobile age - **Collecting potential evidence early in an event's lifecycle is invaluable**
- ✔️ Hoaxes or misuse of valuable resources is expensive - **Categorizing situations quickly reduces costs**
- ✔️ Easy and quick assessment of situations - **Efficient dispatch decisions means effective use of resources**
- ✔️ PSAP ready application that is secure and scalable - **Easy to adopt service with minimal training**
- ✔️ Provides location services - **once the caller begins streaming video the dispatcher receives the GPS coordinates of the callers device needs**
