PoliceWorks® Drink Drive

Enabling Police Forces to conduct
digital Drink Drive procedures

PoliceWorks® Drink Drive is the latest generation of software which intelligently guides Officers through the complexities of the Manual of Guidance Drink Drive (MG DD) procedure.

PoliceWorks® Drink Drive supports digital working, replacing existing paper forms with an onscreen interface, producing a concise PDF format electronic document to attach to the digital case file based only on the route selected.

Benefits

The benefits for Police Forces include the following:

- ✓ Digital output and electronic submission of the MG DD
- ✓ Faster and easier electronic Drink Drive case-file submission, tailored to UK legislation
- ✓ Strong and auditable case presentation to the CPS
- ✓ Procedural compliance and strong governance
- ✓ Integration links to custody applications and/or Evidential Breath Test (EBT) devices
- ✓ Management and campaign information at Officer, Station, Force or Regional level

Breath test recordings

Completion of on-line
form (guidance available)

Form can be saved and
returned to later

Form exported to a
small PDF file

Electronic transfer
to other systems

“ The increase in successful prosecutions combined with improved operational efficiency and cost savings more than justifies our investment and, with the current cutbacks in public sector budgets, both the police and the public can benefit.

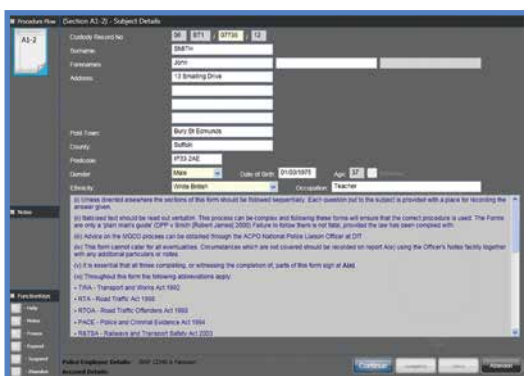

Paul Bennett, Inspector, CMPG

PoliceWorks® Drink Drive can optionally attach to Evidential Breath Test Devices and interface to custody software, removing duplication of data entry.

Consistency in approach across Forces and improved data accuracy can be achieved through regional collaborations to minimise errors in case preparation providing strong and fully auditable case presentation for Drink Drive prosecutions.

Digital working

PoliceWorks® Drink Drive streamlines the MG DD process, replacing the need to complete or scan paper based forms, supporting the CJS efficiency programme.

Cloud hosting

Cloud Hosting offers an alternative to hosting **PoliceWorks® Drink Drive** locally, and is an attractive option for Forces wishing to reduce operational costs.

Regional hosting/implementation

PoliceWorks® Drink Drive can be hosted and configured to support regional collaboration of Forces.

Campaign analysis

PoliceWorks® Drink Drive provides Management Information, Trend and Campaign analysis of evidential Drink Drive procedures at Region, Force, Station or Officer level.

Interfaces

Interfaces to custody systems eliminate the need to re-key information, improving data accuracy and consistency.

EBT device link

PoliceWorks® Drink Drive can attach to Evidential Breath Test Devices, reducing manual entry of data.

Procedural changes

PoliceWorks® Drink Drive is continually enhanced to keep up to date with changes issued by the Department for Transport.

Integration

PoliceWorks® Drink Drive communicates directly with both **PoliceWorks® Case** and **PoliceWorks® Custody** modules, providing seamless integration.
